Discover the assets and the distinctive expertise of French chemical parks at ACHEMA

ACHEMA is the largest World Exhibition on Chemical Engineering which take places from June 11 to 15 2018 in Frankfurt. 12 French chemical parks will be there, to support the colors of the [French Fab](#) and to highlight the attractiveness of France and of their distinctive expertise to foreign investors.

France is the 2nd largest chemical industry in Europe with a turnover of 70 billion euros. It has more than 3,300 companies working in the chemical sector. Some of them are gathered in chemical parks which host in one place several industry players, subcontractors and suppliers. France presents attractiveness for foreign investors: excellent infrastructures, access to multiple sea ports, outstanding R&D supported, competitive clusters, highly qualified personnel. France also benefits from a network of chemical parks that encourages operational synergies: simplified access to infrastructures, shared utilities at lower cost (maintenance, stock and logistics management, etc.) and a pooling of investments and running costs.

Magali Smets, General Manager of the French Chemical Industry Association says: « *France offers a very attractive environment for foreign investors as shown by the recent investments. Our chemical parks are a major asset that we want to promote. This is why they are present at ACHEMA, where they will be able to demonstrate all that they can offer to investors. We hope to see many of them!* »

Come discover the assets and the distinctive expertise of 12 French chemical parks on our dedicated stand at ACHEMA: Hall 9.2 D12

- Chemesis
- Chem'pôle 64
- Induslacq
- Pardies / Noguères
- Comentry Industrial Platform
- Grenoble Chemical Parks
- Lamotte Chemicals Industrial Park
- Les Roches-Roussillon
- Lyon Vallée de la Chimie
- Port-Jérôme, Normandy
- Synerzip Le Havre
- Weurope

L'Union des Industries Chimiques (UIC) est l'organisation professionnelle qui représente les entreprises de la chimie en France. Elle est le porte-parole du secteur auprès des pouvoirs publics nationaux, européens et des instances internationales. L'UIC souhaite mieux faire connaître la chimie et ses applications et mettre en valeur le rôle éminent qu'elle joue au sein de la société.
